SiteSoft GEOTRACK

'SiteSoft makes the complicated...simple'

Craig Dodds
Compliance Manager / Health & Safety Manager
Argosy Property Ltd

SiteSoft provides a clever risk communication solution that helps all types of businesses track their workforces and meet the most important requirements of the 2015 Health & Safety Act – to inform visitors about the risks and hazards of that site – and to gain specific acknowledgement of these.

Smart use of Mobile App technology and GeoFencing tells you where your contractors are, for how long and when they left.

SiteSoft tracks contractors with time and date stamped reporting of site entry and exits and an ability to 'see' a contractor on your property via the administrator's portal – particularly useful for larger properties.

Property managers give contractors SiteSoft free to keep them safe, and to gain essential acknowledgements of risks and hazards.

SiteSoft can develop a custom solution to meet your requirements.

SiteSoft GEOTRACK

Leaders in Heath & Safety and
Contractor Tracking Technology

www.sitesoft.com

SIMPLE - LOW COST - QUICK TO DEPLOY

SITESOFT
KEY FEATURES

Multiple Platform Options

- Utilize SiteSoft GeoTrack from your computer, smartphone or tablet.
- Contractor's onsite need only to enable location services and have logged into the App once to receive site information automatically.

Automated Induction Management

- We ensure that all employees going onsite are presented with information that reduces health and safety risks.
- Induction material and hazards are automatically sent to a contractors mobile upon crossing a sites GeoFence, requiring real time acknowledgement giving them the means to stay safe and avoid hazards.

Protect Your Staff

- SiteSoft provides a level of mechanisms to protect your workforce, provide them with site specific information, generate entrance reports, and know exactly who is on site at all times.

Stay Compliant

- Comply with the Health and Safety at Work Act 2015 (HSWA), mitigate liability, and remain compliant with current standards.

Hazard/Incident Transparency

- Keep a log of site specific incidents, hazards and their controls or how they can be avoided or mitigated.

QR Codes

- As an optional feature QR codes can be utilized within a site linked to specific information and can be scanned from within the SiteSoft GeoTrack App to add more precision to the location of contractors.

GeoTracking

- SiteSoft enables registration of all regular site visitors, staff and contractors by using "Geo-fence" technology to automatically track, time and date-stamp access on and off properties.

Access Management

- Making sure that only qualified employees are onsite.

Document Management

- Make documents required mandatory for upload, ID Photo, certifications, insurance;
- We make sure that all documents you load on the system remains current e.g. we'll send out notifications when the documents are about to expire.

Powerful Reporting

- The system generates detailed reports for any site, log contractors entries/exits, time onsite, reason for visit and more.
- See who is on a site at any one time, access their information, documentation and contact details.

Emergency Plans & Protocol

- Emergency plans are made accessible for those on site through the SiteSoft GeoTrack App. Contractor or staff movements are visible for attendance certification or tracking in the event of a site evacuation.

Saves Time

- Manual sign-ins/sign outs are no longer required saving money by reducing wasted contractor time and associated chargeable costs.
