

**SITESOFT LAUNCHES  
SCHOOL TECHNOLOGY  
WITH AMAZING  
FREE OFFER!**

**Our website gets  
a facelift:  
SiteSoft.com**

Check out our new website  
[www.SiteSoft.com](http://www.SiteSoft.com).

We've introduced a fresh new look – easier to navigate and greater detail around the features and benefits of using SiteSoft.

SiteSoft is an essential NEW technology for schools to meet the demanding requirements of the [Health & Safety at Work Act 2015](#) - track contractors and visitors to your school grounds - ensure they are properly inducted and acknowledge the school risks and hazards.

Track school contractor visits and reconcile time on site, track tasks, manage worker competencies, documents and get your police vetting up to date to meet statutory requirements.

SiteSoft recognises the valuable contribution schools make to the New Zealand community. As a special offer exclusive to our Spring Newsletter readers, **SiteSoft is offering our Premium software package FREE for a one year subscription to the first 5 schools who contact us** on Freephone 0800 748 763 or support@sitesoft.com.

## Cleaning Force chooses SiteSoft

We welcome one of our newest customers; one of New Zealand's oldest cleaning companies.

With over 100 worker contractors, ensuring communication of site risks and hazards at all kinds of different property types is challenging.

SiteSoft ensures that cleaners are properly briefed and acknowledge their understanding of the work environments they are about to enter.

Date and time stamping of arrivals and departures help with reconciliation of time-sheets.

## 14-Day FREE Trial

Have you heard about our 14-day FREE trial?

It's easy to activate and the best way to have a play with SiteSoft technology.

Want to know more, activate your free trial here:

## New web platform now launched

Our New Web platform has been released for administrators to complement the mobile and tablet SiteSoft GeoTrack App.

This cuts down the time needed to format induction material and provides an easy to use base of operations for maintaining Health & Safety and contractor management.

Look out for these new features in the September release:

**Notifications** to stakeholders when a new Hazard or Incident is added.

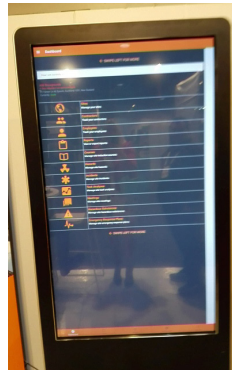

**Attaching files** such as PDFs to induction material, to save time in formatting and editing.

## Property Trust finds answer in SiteSoft

With a large property portfolio this owner also has a large number of contractors ensuring that day-to-day property maintenance keeps pace with tenant requirements.

SiteSoft tracks contractor activity on and off site – so that the property managers know when contractors visited and the primary reason for their visit. SiteSoft simple reporting feature can be used to reconcile contractor attendance to support invoicing.

## SiteSoft exhibits at National Safety Show

We recently exhibited at the National Safety Show at ASB Showgrounds on 4 & 5 July 2018. Over 75 key industry suppliers and thought leaders come together to provide information to create a safer workplace to over 5,000 trade visitors.

During this show, we provided a large scale digital kiosk to showcase our SiteSoft mobile app solution which helps ensure a thorough supervision of Health & Safety related aspects for your workplace, controlling and monitoring access, allowing identification of risks and hazards, providing induction controls and allows easy communications to those on or in a workplace.

## Upcoming Events

We look forward to showcasing our Health & Safety and Contactor technology solution at these future events:

- [5-7 September 2018](#)  
[HASANZ Conference](#)  
SiteSoft Stand 5  
Te Papa, Wellington
- [23-26 October 2018](#)  
[NZPF Conference](#)  
SiteSoft Stand 67  
TSB Arena, Wellington

## Quick Tips

### Custom Induction with Cut & Paste

It's easy to create a custom induction course for contractors to better equip them to be on your sites.

Utilize our new administrator's website on your desktop computer – open up your Word file(s) to cut and paste, enhance formatting and simply cut and paste on to the SiteSoft screen.

It couldn't be simpler to get custom and detailed information for your contractors and workers to acknowledge.

### Q-Codes

A simple to use SiteSoft feature. A client with a hatch leading to a roof has created QR codes within the app that give the roof access codes only to

those who are qualified for roof access.

SiteSoft clients use QR codes for lots of different reasons including – specific messaging at points inside a geo-fenced property eg. where re-modelling construction may be taking place and additional risk and hazard communication is required.

Speak to our technical and sales team about how to implement QR codes at your sites.
