BC GROUP

siteconnect

Ensure your buildings are maintained correctly with our Digital Log Book powered by SiteConnect.

"Capture all relevant information on your site visitors."

BC Group's new Digital Log Book will record the details of the person visiting the site, note which specified system they are maintaining, capture their IQP number, and capture if there are any remedial items for any of the Specified Systems within that property.

Visitor Tracking

To ensure the contactor is doing their job correctly the Client can tell how long and when the contractor was on site.

Accurate Payment

With our digital log book you can pay the contractors invoices and know they have done the job.

Auditor Access

Auditors can type in the very simple address at the bottom of all our BWOF's and get access to the log book digitally.

As a PCBU under the Health and Safety Work Act 2015, it is the building owners responsibilities to ensure their buildings are safe. To help our clients ensure their buildings are correctly maintained, BC Group have come up with a new innovative solution.

A number of our clients are failing Council initiated audits because they have failed to log and record the contractors they have engaged to maintain their specified systems in their buildings.

We have partnered with SiteConnect to bring you the Digital Log Book. SiteConnect are the emerging leader in Site Management and Health & Safety Software and are the providers of the technology behind the Digital Log Book. We are confident that this partnership will bring you the best technology in the industry.

If a remedial item is recorded (a remedial item is work required to get the system working 100%) then an automated weekly reminder will be sent to that contractor to remind them that this needs to be completed.

BC Group see this as a great tool for our clients to enable greater effective control over their contractors and meet the legal requirements under the Building Act to ensure their buildings are maintained correctly.

This service is only available to BC Group clients.
