

PCBU's in the Education sector need SiteConnect to comply with the HSWA 2015 and reduce personal liability.

RISK COMPLIANT

Is your Board of Trustees taking all reasonably practical steps to keep employees, volunteers, contractors, consultants & trainees safe?

POLICE VETTING

Are you Police vetting your contractors and consultants every 2 years to remain complaint with the HSWA 2015?

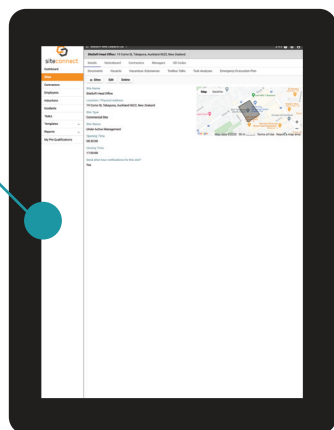

TRACKING PERSONNEL

Do you know who is on your site? Are all workers and visitors to your site signed in and inducted?

HOW SITECONNECT CAN HELP YOUR SCHOOL

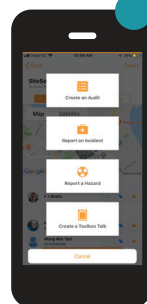

TRACKING

SiteConnect can check you, your visitors and workers in and out of your property in real time with our sophisticated geo-fencing technology.

MOBILE APP

SiteConnect has a mobile app that keeps all your Health & Safety documents at your finger tips.

ID CARDS

SiteConnect can supply ID cards so you can easily identify visitors on your site.

SITECONNECT

EDUCATORS FEATURES

New Zealand schools are subject to compliance with the [New Zealand Health & Safety Work Act 2015](#), and as such are treated in exactly the same way as any other work place in the country. While the Ministry of Education provides detailed guidelines on compliance requirements, schools have some unique environmental and operational features that require custom solutions.

SiteConnect has developed and continues to refine a technology solution that answers the core requirements of the Act.

SiteConnect 'GeoTrack' is designed to ensure a thorough supervision of Health & Safety related aspects for your workplace, controlling and monitoring access, allowing identification of risks and hazards, providing induction controls and allows easy communications to those on or in a workplace. It does it by:

SiteConnect School Community

Each school that joins the SiteConnect School Community mandate their contractors to use the solution – they are invited by the school and the SiteConnect App is downloaded to their Mobile device (phone or tablet).

Registration of Contractors

Upon registering, the person wishing to enter the school is required to acknowledge the Health & Safety environment including current risks and hazards, completing essential information, and loading necessary certification documents into the SiteConnect application. Our custom features also include the ability to load police vetting documents and public liability insurance certification with ability to diary expiries.

GeoFence

Each physical site that person is permitted to enter has a GeoFence set-up around it that automatically connects to the SiteConnect App. When they enter a permitted site their entry and exit is automatically registered on the system and a list of the risks and hazards are sent to their mobile device which they need to accept as having been received.

GeoFence Reports

The system has valuable reporting capabilities that assist the administration team to understand what is happening on their site; including contractor locations and purpose of visit.

SiteConnect is a New Zealand owned and developed application with accompanying administrative web platform. Enhancements specific to professional property management continue to be added.

SiteSoft

SiteConnect is a product developed and owned by SiteSoft New Zealand Ltd.
